Problem 4a.

$$P_1(f) \equiv \{\forall M \in \mathbb{R}, \exists x \in \mathbb{R} \text{ such that } f(x) > M\}$$

$$P_6(f) \equiv \{\exists(M, K) \in \mathbb{R}^2, \text{ such that } \forall x > K, f(x) > M\}$$

Prove or disprove

$$\{\forall f \text{ satisfying } P_6, f \text{ satisfies } P_1\}.$$

Proof. We will prove the statement as true.

Let f_0 be any function satisfying P_1 .
